Atty. Dkt. No. 016790-0428

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant: Holger BIRK et al.  
Title: METHOD AND INSTRUMENT FOR MICROSCOPY  
Appl. No.: 09/881,049 ✓  
Filing Date: 06/15/2001  
Examiner: B. Healy  
Art Unit: 2883

**INFORMATION DISCLOSURE STATEMENT**  
**UNDER 37 CFR §1.56**

MAIL STOP: ISSUE FEE  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicants in order to comply with Applicants' duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicants do not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

**TIMING OF THE DISCLOSURE**

**The RCE was filed on October 29, 2004 along with a request that prosecution be suspended for three months and the required RCE and suspension fees. Applicants requested suspension in order to prepare and file this Information Disclosure Statement to cite (out of an abundance of caution) all of the prior art in the related cases (the related cases were identified in the November 9, 2001 IDS). Because this IDS is being filed during a period of suspension immediately following an RCE, this IDS is timely.**

**RELEVANCE OF EACH DOCUMENT**

Document B34 discloses a device for feeding a UV laser into a confocal laser scanning microscope. Documents B2 and B34 claim priority based on the same first-filed applications.

Document B35 discloses a short pulse laser in a microscopic radiation path coupling device for a scanning microscope. Document B14 claims priority based on document B35.

Document B36 discloses an optical arrangement with a spectrally selective element for use in the beam path of a light source suitable for stimulation of fluorescence, preferably a confocal laser-scanning microscope.

Document B37 discloses a beam splitter for use in a laser scanning microscope.

Document B38 discloses a luminescence-scanning microscopy process and a luminescence scanning microscope utilizing picosecond or greater pulse lasers. Document B22 claims priority based on document B38.

English translations of the foreign-language documents are not readily available. However, English language abstracts are provided herewith. Consequently, the foreign language documents have been submitted in compliance with the PTO requirements and,

therefore, the document should be considered by the Examiner (37 CFR §1.97, §1.98 and MPEP §609).

Applicants respectfully request that any listed document be considered by the Examiner and be made of record in the present application and that an initialed copy of Form PTO/SB/08 be returned in accordance with MPEP §609.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 CFR §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 19-0741. Should no proper payment be enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 19-0741.

Respectfully submitted,

Date January 13, 2005

FOLEY & LARDNER LLP
